

SleighBuilder::setLabel

MacroBuilder::setLabel

PcodeBuilder::getLabelBase

```
graph LR; A[SleighBuilder::setLabel] --> C[PcodeBuilder::getLabelBase]; B[MacroBuilder::setLabel] --> C;
```

The diagram illustrates a dependency or relationship between three methods. On the left, two white rectangular boxes are stacked vertically. The top box contains the text 'SleighBuilder::setLabel' and the bottom box contains 'MacroBuilder::setLabel'. On the right, a gray rectangular box contains the text 'PcodeBuilder::getLabelBase'. Two blue arrows originate from the right side of the left boxes and point towards the left side of the gray box, indicating that both 'SleighBuilder::setLabel' and 'MacroBuilder::setLabel' depend on or call 'PcodeBuilder::getLabelBase'.
