

ghidra.app.decompiler.component.
ClangFieldElement.substring

ghidra.app.decompiler.component.
ClangFieldElement.replaceAll

ghidra.app.decompiler.component.
ClangFieldElement.ClangFieldElement

```
graph LR; A["ghidra.app.decompiler.component.ClangFieldElement.substring"] --> C["ghidra.app.decompiler.component.ClangFieldElement.ClangFieldElement"]; B["ghidra.app.decompiler.component.ClangFieldElement.replaceAll"] --> C;
```

The diagram illustrates a relationship between two source methods and a target class. On the left, two white rectangular boxes with black borders contain the method names: 'ghidra.app.decompiler.component.ClangFieldElement.substring' (top) and 'ghidra.app.decompiler.component.ClangFieldElement.replaceAll' (bottom). On the right, a gray rectangular box with a black border contains the class name 'ghidra.app.decompiler.component.ClangFieldElement.ClangFieldElement'. Two blue arrows point from the right side of each source method box to the left side of the target class box, indicating that both methods are associated with or inherit from this class.
