

JumpAssisted::recoverModel

JumpAssisted::buildAddresses

JumpAssisted::buildLabels

UserPcodeOp::getName

```
graph LR; A[JumpAssisted::recoverModel] --> D[UserPcodeOp::getName]; B[JumpAssisted::buildAddresses] --> D; C[JumpAssisted::buildLabels] --> D;
```

The diagram illustrates a directed graph with four nodes. Three nodes on the left, 'JumpAssisted::recoverModel', 'JumpAssisted::buildAddresses', and 'JumpAssisted::buildLabels', are white with black borders. A single node on the right, 'UserPcodeOp::getName', is gray with a black border. Three blue arrows point from each of the left nodes to the right node, indicating a directed relationship or dependency.
