

PcodeOp::getNZMaskLocal

RuleShiftBitops::applyOp

pcode_right

```
graph LR; A[PcodeOp::getNZMaskLocal] --> C[pcode_right]; B[RuleShiftBitops::applyOp] --> C;
```

The diagram illustrates a control flow or data dependency. Two rectangular boxes on the left, one above the other, represent functions: 'PcodeOp::getNZMaskLocal' and 'RuleShiftBitops::applyOp'. Both boxes have a black border and white background. Two blue arrows originate from the right side of these boxes and point towards a single rectangular box on the right. This box, labeled 'pcode_right', has a black border and a light gray fill. The arrows are positioned such that they appear to merge into the 'pcode_right' box, indicating that both functions contribute to or lead to this state or variable.
