

StructureGraph::rawAction

IfcStructureBlocks
::execute

BlockGraph::structureLoops

```
graph LR; A[StructureGraph::rawAction] --> C[BlockGraph::structureLoops]; B[IfcStructureBlocks::execute] --> C;
```

The diagram illustrates a flow or dependency. On the left, there are two white rectangular boxes. The top box contains the text 'StructureGraph::rawAction'. The bottom box contains the text 'IfcStructureBlocks' followed by '::execute' on a new line. Two blue arrows originate from the right side of these boxes. The arrow from the top box points to the top-left corner of a third box. The arrow from the bottom box points to the top-left corner of the same third box. This third box is gray and contains the text 'BlockGraph::structureLoops'.
