

MinusExpression::saveXml

NotExpression::saveXml

UnaryExpression::saveXml

```
graph LR; A[MinusExpression::saveXml] --> C[UnaryExpression::saveXml]; B[NotExpression::saveXml] --> C;
```

The diagram illustrates a method inheritance or delegation relationship. On the left, two white rectangular boxes are stacked vertically. The top box contains the text 'MinusExpression::saveXml' and the bottom box contains 'NotExpression::saveXml'. On the right, there is a single gray rectangular box containing the text 'UnaryExpression::saveXml'. Two blue arrows originate from the right side of the two white boxes on the left and point towards the left side of the gray box on the right, indicating that both 'MinusExpression::saveXml' and 'NotExpression::saveXml' inherit from or delegate to 'UnaryExpression::saveXml'.
