

PcodeCompile::assignBitRange

PcodeCompile::createBitRange

PcodeCompile::buildTruncated
Varnode

```
graph LR; A[PcodeCompile::assignBitRange] --> C[PcodeCompile::buildTruncated Varnode]; B[PcodeCompile::createBitRange] --> C;
```

The diagram illustrates a functional dependency or call relationship. On the left, two white rectangular boxes are stacked vertically. The top box contains the text 'PcodeCompile::assignBitRange' and the bottom box contains 'PcodeCompile::createBitRange'. On the right, a single gray rectangular box contains the text 'PcodeCompile::buildTruncated Varnode'. Two blue arrows originate from the right side of the left boxes and point towards the left side of the gray box, indicating that both 'assignBitRange' and 'createBitRange' are functions that call or utilize 'buildTruncated Varnode'.
