

lfcBreakaction::execute

lfcBreakstart::execute

Action::setBreakPoint

```
graph LR; A[lfcBreakaction::execute] --> C[Action::setBreakPoint]; B[lfcBreakstart::execute] --> C;
```

The diagram illustrates a directed relationship between two source nodes and a target node. On the left, there are two white rectangular boxes with black borders. The top box contains the text 'lfcBreakaction::execute' and the bottom box contains 'lfcBreakstart::execute'. On the right, there is a single gray rectangular box with a black border containing the text 'Action::setBreakPoint'. Two blue arrows originate from the right side of the left boxes and point towards the left side of the gray box, indicating that both 'lfcBreakaction::execute' and 'lfcBreakstart::execute' lead to 'Action::setBreakPoint'.
