

ActionActiveParam::
apply

ActionReturnRecovery
::apply

ParamActive::markFullyChecked

```
graph LR; A[ActionActiveParam::apply] --> C[ParamActive::markFullyChecked]; B[ActionReturnRecovery::apply] --> C;
```

The diagram illustrates a flow where two separate actions, 'ActionActiveParam::apply' and 'ActionReturnRecovery::apply', both lead to a single target state or action, 'ParamActive::markFullyChecked'. The target is highlighted with a gray background, while the source actions are in white boxes. Blue arrows indicate the direction of the flow from the sources to the target.
