

ActionActiveParam::
apply

ActionReturnRecovery
::apply

ParamActive::finishPass

```
graph LR; A[ActionActiveParam::apply] --> C[ParamActive::finishPass]; B[ActionReturnRecovery::apply] --> C;
```

The diagram illustrates a control flow where two different actions, 'ActionActiveParam::apply' and 'ActionReturnRecovery::apply', both lead to the same target operation, 'ParamActive::finishPass'. The target operation is highlighted with a gray background, while the source actions are in white boxes. Blue arrows indicate the direction of the flow from the source actions to the target.
