

BlockGraph::newBlockList

```
graph LR; A[BlockGraph::newBlockList] --> B[FlowBlock::sizeOut]; A --> C[FlowBlock::getOut];
```

The diagram illustrates a call graph where the method `BlockGraph::newBlockList` (represented in a gray box) calls two other methods: `FlowBlock::sizeOut` and `FlowBlock::getOut` (both in white boxes). Two blue arrows originate from the right side of the gray box and point to the left side of each of the two white boxes.

FlowBlock::sizeOut

FlowBlock::getOut
