

ContextDatabase::setVariable

ContextDatabase::setContext
ChangePoint

ContextDatabase::getRegion
ToChangePoint

```
graph LR; A[ContextDatabase::setVariable] --> C[ContextDatabase::getRegion ToChangePoint]; B[ContextDatabase::setContext ChangePoint] --> C;
```

The diagram illustrates a flow or dependency. On the left, there are two rectangular boxes. The top box contains the text 'ContextDatabase::setVariable'. The bottom box contains the text 'ContextDatabase::setContext' followed by 'ChangePoint' on a new line. On the right, there is a single rectangular box with a light gray background, containing the text 'ContextDatabase::getRegion' followed by 'ToChangePoint' on a new line. Two blue arrows originate from the right side of the left boxes and point towards the left side of the right box. The top arrow starts from the bottom edge of the top box, and the bottom arrow starts from the top edge of the bottom box.
