

CommentOrder::operator()

CommentDatabaseInternal  
::restoreXml

Comment::getFuncAddr

```
graph LR; A[CommentOrder::operator()] --> C[Comment::getFuncAddr]; B[CommentDatabaseInternal::restoreXml] --> C;
```

The diagram illustrates two function calls on the left pointing to a single target function on the right. The target function, 'Comment::getFuncAddr', is highlighted with a gray background. The first call, 'CommentOrder::operator()', is in a white box at the top left. The second call, 'CommentDatabaseInternal::restoreXml', is in a white box at the bottom left. Blue arrows connect each call box to the target box.
