

PcodeInjectLibraryGhidra
::getBehaviors

PcodeInjectLibrarySleigh
::getBehaviors

Architecture::collectBehaviors

```
graph LR; A[PcodeInjectLibraryGhidra::getBehaviors] --> C[Architecture::collectBehaviors]; B[PcodeInjectLibrarySleigh::getBehaviors] --> C;
```

The diagram illustrates a mapping or delegation of behavior collection. On the left, two white rectangular boxes represent source functions: 'PcodeInjectLibraryGhidra::getBehaviors' (top) and 'PcodeInjectLibrarySleigh::getBehaviors' (bottom). On the right, a gray rectangular box represents the target function: 'Architecture::collectBehaviors'. Two blue arrows originate from the right side of the source boxes and point towards the left side of the target box, indicating that both source functions delegate the 'collectBehaviors' task to the target function.
