

ParameterSymbol::setNameLock

```
graph LR; A[ParameterSymbol::setNameLock] --> B[Scope::setAttribute]; A --> C[Scope::clearAttribute];
```

The diagram illustrates a call to the method `ParameterSymbol::setNameLock`. This call results in two subsequent actions: `Scope::setAttribute` and `Scope::clearAttribute`. The initial call is represented by a grey box, while the resulting actions are in white boxes. Blue arrows indicate the flow from the initial call to each of the two resulting actions.

Scope::setAttribute

Scope::clearAttribute
